

PEERLESS
Natural Gas

Peerless Leadership in Natural Gas Separation and Filtration

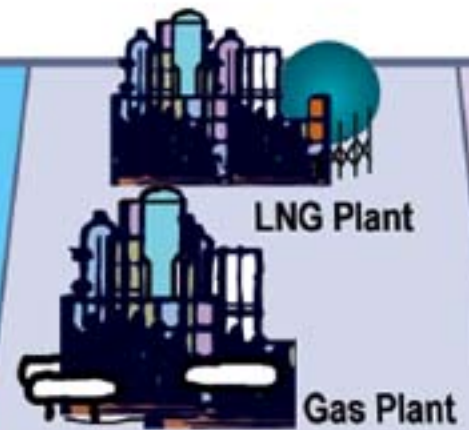

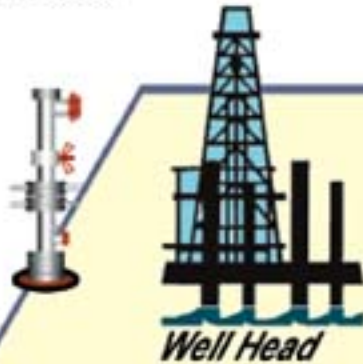

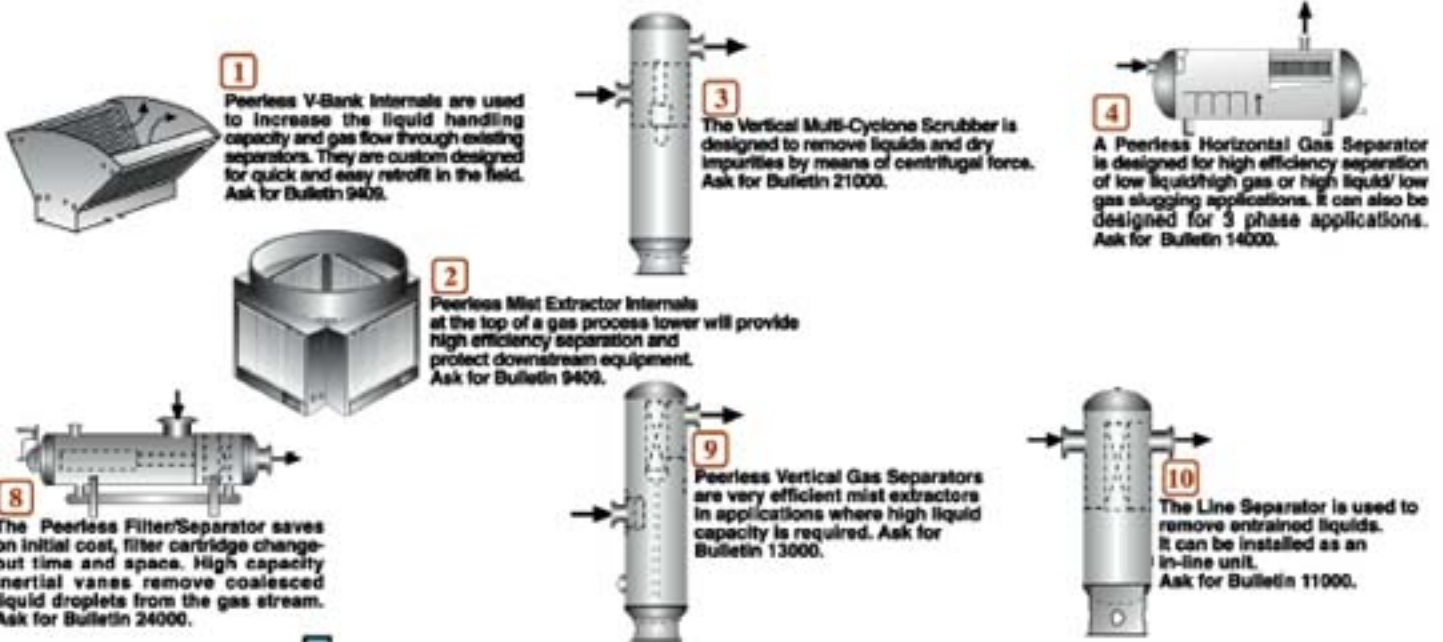

- Innovative Designs
- Complete Line of Separation and Filtration Solutions
- Cost Effective Retrofits
- Guaranteed Performance

Peerless Has the Whole Package for...

Producers, Gatherers, Processors, Transporters, Distributors and End Users.

Peerless...your Gas Processing Problem Solver

Throughout the gas processing industry, you certainly find entrained liquids and solids in the gas stream and a potential application for Peerless systems and equipment. With our

Peerless has the Problem Solving Formula:

- Experienced Applications Engineers to examine your problem, recommend the right separator for a custom-designed solution.

5

Peerless Slug Catching Scrubbers are very efficient centrifugal separators used in applications where a high liquid and solids removal rate is required. Ask for Bulletin 21000.

6

A Peerless Swirl Tube Separator provides ultra-high efficiency removal of liquid particles with low solids concentrations at high gas throughput. Virtually maintenance free. Ask for Bulletin 26000.

7

Peerless Dry Gas Filters are designed for maximum operating and change-out efficiency. A quick-release filter cartridge retainer saves on replacement time and costs. Ask for Bulletin 31000.

11

An Absolute Separator provides ultra-high efficiency for the removal of submicron liquid particles. Ask for Bulletin 25000.

12

Peerless Pulsation Dampeners protect reciprocating compressors and pump piping systems from damaging vibrations which occur during operation. Ask for Bulletin 51-100P/9405.

14

Selective Catalytic Reduction (SCR) Systems reduce NO_x emissions from industrial combustion sources. Ask for SCR Bulletins 9905 & 9908.

13

In plants where gas turbines are used, Peerless provides Fuel Gas Conditioning Systems (FGCS). Ask for FGCS Bulletin.

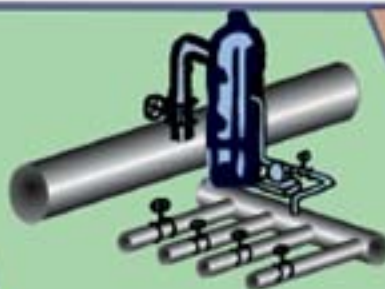

15

The Peerless Odorizer is available for economical, uniform and environmentally safe odorization under wide ranges of flow, temperature and pressure conditions. Ask for Bulletin 42000.

Economical Separators for New Construction

Peerless knows about entrainment. Separators are our speciality. Our Proprietary Sizing™ and fit-for-purpose designs reduce your

Cost Effective Retrofits

Peerless knows about separators. Retrofitting your existing separator with Peerless high

PEERLESS

Your Gas Separators Directly Affect Your Bottom Line!

• Efficiently

- Remove liquid and solid contaminants simultaneously.
- Protect expensive downstream equipment.
- Optimize operations.

• Your Economic Benefits Are Obvious

- Less process contamination equals lower operating costs.
- Less damage to your processing equipment equals lower maintenance costs.
- Lower product, solvent and reagent losses equals lower operating costs.
- Lower installed cost with Peerless separator equals lower capital costs.

Peerless...thousands of units installed
in natural gas pipelines worldwide.

...the Global leader in Separation
and Filtration.
